CHWAŁEK MARTA	pozytywna / positive	Marta's presentation was well-prepared and clear. She definitely made a good progress in her research and her goals were met. Even some from the 3rd year tasks were already completed. Marta clearly has established most of the methods required for her PhD project. During the Q&A session the answers could me more precise. For example Marta did not explain what are the potential functions of the AXL interactors tested as regulators of macropinocytosis.
