

Nano biotechnology methods and applications

Iraj Alipourfard, MD, PhD

Email: ialipourfard@ichf.edu.pl

Course: Online (in case of interest possible by attendance)

Date: Beginning in March- Registration deadline: 8th march 2024.

Assessment: Optional to a topic presentation OR a multiple choice exam

- Nanoparticle Synthesis, Functionalization, Characterization methods
- Nanofabrication: methods and application
- Nano Drug Delivery systems: Liposomal, Polymeric, Dendrimers
- Nano imaging methods: Quantum dots
- Nano Protein Engineering
- DNA Technology
- PCR (Polymerase Chain Reaction):
- DNA Sequencing
- Gene Editing methods
- Cloning and recombinant protein production
- Immunoassay methods: ELISA, RIA, FIA
- Blotting techniques
- Fluorescence in Situ Hybridization (FISH)
- Gene Expression Analysis: qPCR, RNA-seq, microarrays
